WorkRadar: Demo Video Script (6 to 7 minutes)

Record with Loom at 1440 x 900. Before you start, open the live app, the Figma file, the presentation and the GitHub repo in tabs. In the app, open Demo controls and press Reset demo data. | Pravarsha - Airtribe AIPM - Cohort 40

Time	Part	On screen	What to say
0:00 to 0:40	The problem	Presentation slides 1 to 3	A PM’s work comes from four tools. The worst part is easy to miss: someone on your team waiting days for your answer. WorkRadar puts the four answers a PM needs on one screen.
0:40 to 1:30	Product decisions	Slides 4 to 7	Who it is for, the four choices I made and why, what is in the MVP, and how I will measure success.
1:30 to 2:00	Design	Figma file	Walk through the screens. Point out the purple colour for blocked on you, the reason tags, the launch checklist and the empty and error screens. Say the screens come straight from the app, so they match.
2:00 to 3:20	Live app: Today	Live app	Read the summary, click Write with Claude. Show the five counts. Click Decide now for Arjun, pick OTP, add a note, click Decide and unblock. Show the launch card move from 4 to 5 of 10.
3:20 to 4:20	Feed and actions	Priority feed, Android incident	Filter Waiting on you. Open the Android incident, click Ask Claude, then Copy draft. Assign one item, snooze one to Monday, mark one done, then Undo.
4:20 to 5:00	Search	Search page	Search launch, then @meera, then is:blocked. Ask Claude what is at risk for the launch. Show the no results screen.
5:00 to 5:30	Error and empty	Demo controls	Simulate the GitHub sync failure and reconnect. Clear all work to show the empty screen, then reset.
5:30 to 6:20	AI workflow	Slides 12 and 13, GitHub repo	Which tools I used, what AI made, what I changed and why. Show the README and the tests.
6:20 to 7:00	What is next	Slides 14 and 15	Real tool connections, updating tools from WorkRadar, ranking feedback, a Slack morning summary. End with the main metric.

Tips for recording

- Zoom the browser to 110% so the text is easy to read.
- Say the numbers out loud: score 86 on the incident, 2 teammates blocked on you, launch at 4 of 10.
- Allow Claude access once before you record, so the permission popup does not interrupt you.
